

# CS 220 - Pseudo-Code

- Grab a Worksheet (2 pages)
- Corrections
  - quizzes due on Mondays
- Chess Handles:
  - chess.com: louisoliphant (backatcha)
  - lichess.org: bakatcha

# Getting Lecture Material

- Get lecture material using `pixi`: (PREFERRED METHOD)
  1. open a terminal or powershell window
  2. change directory to the cs220 folder
  3. type the command `pixi run lecture`
- Get lecture material by downloading:
  1. Go to the course schedule
  2. Click the link for the lecture
  3. Click on each file and click the download button
  4. move the files into a folder inside of cs220

# Doing The Worksheet

- Partner up
  - Introduce yourself and something about you
- You do the code steps (i.e. you are the computer)
- You answer the questions after the code
- Compare your answer with your partner's. Note any differences between how you “executed” the code and anything surprising you observed
- Wait for us to discuss as a class before you move on to the next question
